SUMMARY

Full stack developer with 2+ years of production experience building scalable REST APIs and real-time applications using Node.js, NestJS, Express.js, React, and TypeScript, with MongoDB and PostgreSQL as primary data stores. Additional hands-on experience with Laravel and ASP.NET Core. Strong focus on clean architecture (service layer, repository pattern), secure API design (JWT), WebSocket-based real-time systems, and database performance optimization.

TECHNICAL SKILLS

- Languages & Core: TypeScript, JavaScript, PHP, C#, SQL
- Backend: Node.js, NestJS, Express.js, Laravel, ASP.NET Core
- Frontend: React.js, HTML, CSS, JavaScript
- Databases: MongoDB, PostgreSQL, MySQL, SQL Server, Firebase, Supabase
- Architecture & Practices: REST APIs, WebSockets, MVC, Service Layer, Repository Pattern, JWT Authentication, Role-Based Access Control, Database Indexing & Query Optimization
- Tools: Git, GitHub, Docker, Postman, Redis, Pusher, Firebase Cloud Messaging (FCM)

WORK EXPERIENCE

Backend Developer — Intern to Mid-Level

March 2023 – Present

Bidec Solutions, Karachi, Pakistan

Progressed from Backend Developer Intern → Junior Backend Developer → Mid-Level Backend Developer through consistent delivery and technical growth.

- Lead development of backend modules using NestJS and Laravel across marketplace, CMS, and multi-platform business systems.
- Built and documented RESTful APIs consumed by frontend teams, ensuring reliable data contracts and secure, consistent integration.
- Applied service-layer and repository-pattern architecture, improving maintainability and reducing code duplication across projects.
- Enforced secure API authentication and authorization using JWT, applying role-based access control across platform features.
- Optimized database performance through query tuning and indexing strategies across PostgreSQL, MySQL, and SQL Server.
- Implemented Redis caching and performance profiling to enhance system efficiency and reduce response latency.
- Mentored junior team members and participated in code reviews and technical planning discussions for new features.

PROJECTS

Ride n Share — Real-Time Ride Booking App — *NestJS, PostgreSQL, WebSockets, Firebase Cloud Messaging*

- Designed and built backend services for ride booking, driver management, and trip lifecycle workflows using NestJS and PostgreSQL.
- Implemented real-time ride updates and live driver tracking using WebSockets for low-latency rider-driver communication.
- Integrated Firebase Cloud Messaging (FCM) for push notifications covering ride requests, status changes, and alerts.
- Built and maintained RESTful APIs for a structured ride flow (request, accept, start, complete) focused on scalability.

Hotel Management System — *Express.js, React, MongoDB*

- Built a complete hotel management system solo, covering booking, housekeeping/cleaning workflows, automated room-status updates, and the full checkout flow.
- Designed the MongoDB data model and added indexing on high-traffic endpoints (room booking, room status) to speed up API response times.

- Developed the full stack independently — Express.js/Node.js backend and React frontend — with source available on GitHub.

Nehlum — CMS Platform — *NestJS, PostgreSQL, REST APIs*

- Designed backend architecture for a CMS platform supporting structured content management and dynamic page generation.
- Built scalable REST APIs and modular services, reducing duplicate business logic through reusable backend components.
- Deployed and maintained the live platform (nehlum.com).

Ma3rood — Multi-Category Marketplace — *Laravel, MySQL*

- Developed a scalable multi-category marketplace (e-commerce, motors, property, services, jobs) with a focus on performance and modular architecture.
- Implemented role-based access control and optimized database queries for efficient data handling across listing types.
- Integrated background job processing using Laravel Queues to handle asynchronous tasks and improve responsiveness.

Bidec Solutions Website — CMS Platform — *Laravel, MySQL, SEO*

- Developed a corporate CMS platform enabling dynamic, SEO-focused content management.
- Implemented SEO-friendly features including clean URL structures, metadata management, and redirection handling.
- Built and maintained the live platform (bidecsol.com).

EDUCATION

Bachelor of Data Science — Virtual University of Pakistan (2026 – 2030, In Progress)

Advanced Diploma in Software Engineering — Aptech Metro Star Gate (2023 – 2026, In Progress)
