### SUMMARY

Backend Developer with 2+ years of hands-on experience designing and building scalable REST APIs and backend systems using Laravel, ASP.NET Core, and NestJS. Strong focus on performance optimization, clean and reusable architecture, and secure API design, with solid experience in MySQL and SQL Server, including query optimization, indexing, and data integrity.

### WORK EXPERIENCE

**Bidec Solutions** *March, 2023 – Present*

---

#### Backend Developer Intern *(March 2024 – May 2024)*

- Assisted in building and testing REST API endpoints using Laravel under senior developer supervision.
- Learned and applied backend development best practices including MVC architecture and database query optimization.
- Participated in code reviews and contributed minor features to existing backend modules.
- Supported debugging efforts and wrote basic unit tests to validate API responses.

---

#### Junior Backend Developer *(June 2024 – February 2025)*

- Developed and maintained Laravel-based backend modules integrated into core business platforms.
- Built and documented REST APIs consumed by frontend teams, ensuring clear contracts and reliable data flow.
- Implemented reusable service components that improved code maintainability and reduced duplication across projects.
- Collaborated with frontend and product teams to ensure secure and consistent API integration.
- Assisted in database-level optimization, including query tuning and indexing strategies to improve performance.

---

#### Mid-Level Backend Developer *(March 2025 – Present)*

- Lead development of backend modules in both Laravel and NestJS, contributing to multi-platform business systems.
- Designed and optimized high-performance APIs, improving system scalability and reducing response latency.
- Took ownership of module integrations, coordinating with cross-functional teams to deliver reliable and secure solutions.
- Applied architectural patterns such as service layers and repository patterns to improve long-term code structure.
- Mentored junior team members and participated in technical planning discussions for new features.
- Conducted performance profiling and implemented caching strategies to enhance system efficiency.

### EDUCATION

**Bachelor of Data Science — Virtual University (2026–2030)**

- In Progress

- In Progress

## **RECENT PROJECTS**

### **Ma3rood — Multi-Category Marketplace (Laravel)**

- Developed a scalable multi-category marketplace (e-commerce, motors, property, services, and jobs) using Laravel and MySQL, with a focus on performance and modular architecture.
- Implemented role-based access control and optimized database queries to ensure efficient data handling across multiple listing types.
- Integrated background job processing using Laravel Queues to handle asynchronous tasks and improve application responsiveness.
- Built a multi-language support system using observers to manage dynamic content translation across the platform

### **Ride n Share — Real-Time Ride App (NestJS)**

- Designed and developed backend services using NestJS and PostgreSQL to support ride booking, driver management, and trip lifecycle workflows.
- Implemented real-time ride updates and live driver tracking using WebSockets, enabling low-latency communication between riders and drivers.
- Integrated Firebase Cloud Messaging (FCM) for push notifications, ensuring timely updates for ride

requests, status changes, and alerts.

- Built and maintained RESTful APIs with a structured ride flow (request, accept, start, complete), focusing on scalability and efficient data handling.

### **Bidec Solutions Website — CMS Platform (Laravel)**

- Developed a corporate CMS platform using Laravel, enabling dynamic content management tailored for SEO-focused publishing.
- Implemented SEO-friendly features including clean URL structures, metadata management, and proper redirection handling.
- Designed flexible content modules to support writers and non-technical users in managing pages and blog content efficiently.
- Built and maintained the live platform (bidecsol.com) with a focus on performance, usability, and maintainability.

### **Nehlum — CMS Platform (NestJS)**

- Developed a CMS platform using NestJS, enabling dynamic page creation and structured content management.
- Designed RESTful APIs to support flexible content delivery and seamless frontend integration.
- Implemented modular architecture for maintainability and scalability of content-driven features.
- Deployed and maintained the live platform (nehlum.com), focusing on performance and reliability.

## **SKILLS**

### **Professional Proficiency**

- **Backend & APIs:** PHP, Laravel, NestJS
- **Databases:** MySQL, SQL Server, PostgreSQL
- **Tools & Practices:** Git, RESTful Architecture, WebSockets, Pusher, MVC

### **Intermediate Proficiency**

- **Backend & APIs:** Express.js, ASP.NET Core (C#)
- **Frontend:** HTML, CSS, JavaScript, React, API Integration with frontend
- **Databases:** Firebase, Supabase

### **Beginner / Familiar**

- **Backend & APIs:** Python, FastAPI
- **Databases:** Firebase
- **Data & Analytics:** Data pipelines, analytics workflows
